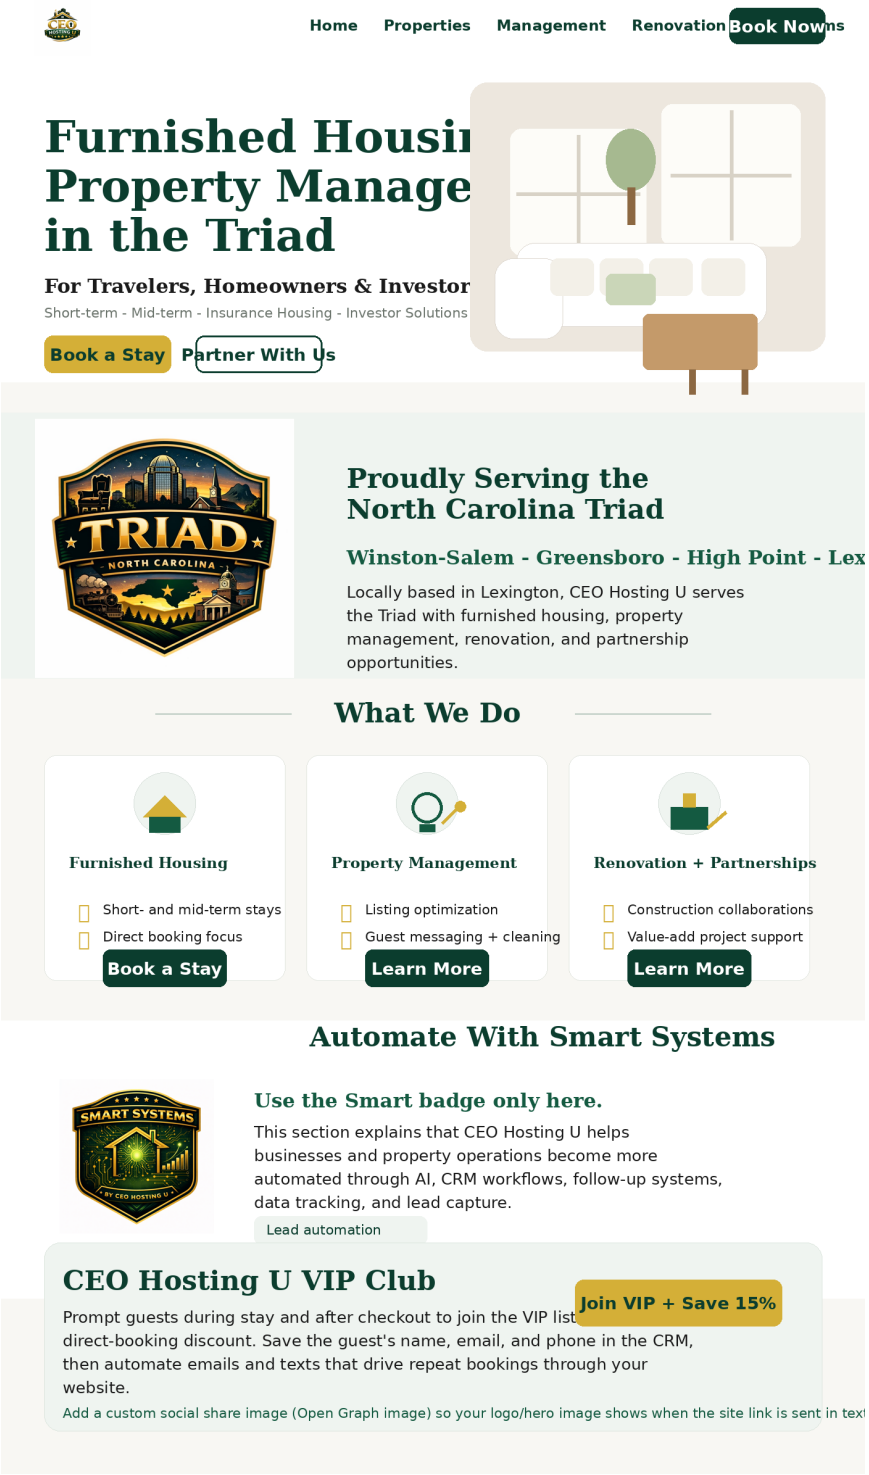
CEO Hosting U

Final Website Launch Brief + Visual Direction for Developer

This brief explains the final direction for the website redesign, how to use the brand assets, how to present the Triad/local positioning, how to separate the AI automation offer, and how to build the VIP repeat-booking funnel.



The visual on page 1 shows the overall design direction for launch.

1. Final Brand Asset Rules

- **Main CEO Hosting U logo:** use in the header, footer, and brand identity areas only.
- **Triad badge:** use in the 'Proudly Serving the North Carolina Triad' section to reinforce local authority, development, and regional trust.
- **Smart Systems badge:** use only on the AI / automation section and AI page to explain CRM automation, lead capture, guest follow-up, data tracking, and business workflows.
- **Do not stack all badges in the hero.** The homepage should stay clean, bright, and easy to understand.

2. Homepage Structure

Hero section

- Headline: Furnished Housing & Property Management in the Triad
- Subheadline: For Travelers, Homeowners & Investors
- Support line: Short-term - Mid-term - Insurance Housing - Investor Solutions
- Buttons: Book a Stay and Partner With Us
- Right side visual: bright interior/home photo

Triad authority section

- Place the preferred Triad badge on the left
- On the right, explain the service area: Winston-Salem, Greensboro, High Point, Lexington
- Use this area to mention construction collaboration, development work, and local partnerships

Services cards

- Card 1: Furnished Housing
- Card 2: Property Management
- Card 3: Renovation + Partnerships

AI / Smart Systems section

- Use only the Smart Systems badge here
- Explain that CEO Hosting U helps automate businesses and property operations through AI, CRM workflows, follow-up systems, lead capture, and reporting
- Keep this as a separate sector of the business instead of mixing it into the local housing message

VIP / direct booking section

- Promote the CEO Hosting U VIP list
- Offer a direct-booking discount such as 10 to 15 percent
- Send guests to a /vip page with form + consent checkboxes
- After sign-up, save the contact and trigger follow-up automatically

Final CTA

- Headline: Ready to Get Started?
- Buttons: Call Now and Submit Property

3. What the Developer Should Improve From the Current Site

- Brighten the overall look and use more white space.
- Keep one clear message at the top instead of making the page feel crowded.
- Use real home/lifestyle imagery in the hero instead of relying on logos as the main visual.
- Strengthen the Management page form with more owner-specific fields.
- Replace all 'coming soon' placeholders on Renovation and Contact with real visuals, better placeholders, or embeds.
- Keep the AI page focused on practical automation systems rather than looking like a generic AI agency.

4. VIP Funnel + Customer Data System

Goal: collect repeat-guest contact information with permission, save it automatically, and market direct bookings through your own site.

Website pieces to add

- Create a /vip page
- Headline: Join the CEO Hosting U VIP List
- Offer: save on future direct bookings + get priority access to open dates
- Form fields: first name, email, phone
- Separate email consent and SMS consent checkboxes
- Redirect to a thank-you page with the direct booking link and discount code

Messaging system

- During stay: invite guests to the VIP list for repeat discounts
- After checkout: send a second VIP invitation
- After form submit: welcome email + welcome text + booking link
- Weekly or monthly: send featured stays, cancellations, last-minute openings, or extended-stay offers

Automation goal

- Save guest name, email, and phone automatically into the CRM
- Tag the guest as VIP
- Segment by booking source, property stayed, and stay type if possible
- Use the list to reduce platform dependence and increase direct-booking revenue

5. Social Share / Text Message Preview Image

Add a custom Open Graph preview image so when someone texts or shares the site link, the preview shows a polished CEO Hosting U image instead of a random page image.

- Recommended share image: main logo + bright home image + short tagline such as 'Furnished Housing & Property Management in the Triad'
- Create this as a dedicated social preview image for the homepage
- Use the same image style across major landing pages when useful

6. Final Developer Summary

Area	Final direction
Brand usage	Header = main logo, local section = Triad badge, AI section = Smart Systems badge only
Homepage feel	Bright, welcoming, modern, clean, not dark or cluttered
Local authority	Triad badge + Triad city references + partnership/development language

AI offer	Explain automation, CRM systems, lead flow, guest data capture, and reporting
VIP system	Prompt guests into VIP list, save customer data automatically, push direct booking offers
Social preview	Add custom share image so text shares show a polished branded image

Use this PDF together with the visual mockup as the final editing guide for launch.
